***Allowable Subject Matter***

2. Claims 1, 3-8, 10-18, 22, 24, and 25 (renumbered 1-19) are allowed.

The following is an examiner's statement of reasons for allowance:

The inventive entity persuasively argued (Remark, Pages 9-10) that none of the prior art of record taken singularly or in combination teaches or suggests the combined functional limitations directed to an intermediary device providing responses to discovery requests for services when a registry of services is unavailable by receiving, by the intermediary device, from a client a discovery request for a service; determining, by the intermediary device, whether the registry is unavailable, the

determining including determining an online client state or offline client state of the client indicative of whether the client is communicatively coupled with the registry; altering, by the intermediary device, the discovery request into a modified request appearing to originate from the intermediary; and if the registry is determined to be unavailable, queuing, by the intermediary device, the modified discovery request for delivery to the registry when it becomes and providing, by the intermediary device, to the client a dummy response to the request indicating the service is available, the dummy response indicating that a pseudo service provider is available to perform the requested service to enable the client to issue service requests of the pseudo service provider as recited in claims 1 and 22. The specification of this instant application fully supports the claimed limitations (See Specification, Figs. 2-4, Page 4, ¶0013 through Page 12, ¶0033).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
